

DRAW-A-SAURUS

1

Firstly, to draw your dinosaur's body, start by drawing a small potato like the one below.

2

Add a big curve coming from either side of the bottom of your potato. Join them together to make a chunky tail, perfect for balancing.

5

Don't forget their tiny arms!

6

Now it's time to add their sharp teeth.

FOLLOW THE STEPS TO DRAW YOUR VERY OWN DINOSAUR!

3

Time to draw the dinosaur's head. Draw their big jaws wide open. Make sure to leave room for lots of teeth!

4

Add some legs, feet and claws to give them a sturdy stance.

7

Your dinosaur can't see where it's going! Give it an eye.

8

Finally it's time to add lots of stripes! Not only will they make your dinosaur look cool but it will help them hide when hunting their prey.
